VOL. XIII., NO. 59.

WEDNESDAY, MARCH 10, FRESNO, CALIFORNIA,

PRICE-5 CENTS.

REFUSED TO ANSWER

"Examiner" Witnesses Committed for Contempt

BY A YOTE OF THE SENATE.

Lawrence and Levings Released On Write of Habens Corpus 1ssued By Judge Hughes.

SACRAMENTO, March 9. The senate to day took up the contempt proceedings against Andrew Lawrence, Alonzo Murphy and Louis Levings, Examiner repny and Louis Levings, Lexander re-porters. Each of the trio was asked it succession if he knew of any telegraphic succession in a sum of the country in any senator, besides the bribery story senator to the Examiner. Each witness refused

ing the sergeant at arms to bring all witnesses subpensed before the bar of

witnesses subpensed before the bar of the senate forthwith to answer upentions, and if they persist in a refusal to answer the senate questions they should be committed for contempts. The senator from Santa Clara interspersed his remarks with porconal almaions to the Examiner which he said was incapable of telling the truth and which would be onto its sphere if associated with hoor.

This, he said, was not a persecution

sociated with honor.

This, he said, was not a persention the Examiner; not a persecution of himself. I have been persecution of himself. I have hed to he had been cause I have had the arreve to beard the lion in his den, the Douglass in his hall; but I caro not how much they heap on me. The time will come when my voice will be heard from Sickiyou to San Diego and will be bigger then any newspaper in California, and don't you forget it.

Diego and with be ligger than any newspaper in California, and don't you forget it.

Morehouse referred to the telegram he received from Herrin, who he said was a personal friend of his. He said if any one wanted to know if he received a fee for bill 273 he would say no; it saked if he got a regular fee from the rathroad he would say no. He was employed by the railroad now and than and was glad of it, and there was no attorney in the state with the brains of a anckling down and the would not gladly take his place.

Sometor Bert said he would vote spains the resolution. He said that the questions propounded to the witnesses word not pertinent, and he did not want the engine court to reverse the senate. He said he bad voted the other day to turn the matter over to the grand jury. He thought the churacter of every senator had been sufficiently windicated, that the Learning had been given an opportunity to prove its charges and that as it had not done so it was evident that there was no foundation for them.

Somutor Prick asid that he was a newspaper man and he could feel for the gentlemen at the bar. He thought that if they revealed their authority they would be deserving of the countempt of all the people. He thought his people had as much confidence in him now as before the Economer and he countempt of all the people. He thought his people had as much confidence in him now as before the Economer and he countempt of all the people. He thought the people had as much confidence in him now as before the Economer and he contempt of all the people. He thought people had as much confidence in him now as before the Economer and he contempt of all the people. He should not be adjusted that there was no truth in the charges. Senator System application had in its favor. Senator Pediar spake in favor of the resolution. He said that he allow only the resolution. He said that he allow of the Economer and that he allowed against the resolution than in it favor.

Extender admitted the falety of the statements. Senator Boyce was in favor of the resolution. Its said it a man can assail the character of men on the floor and say that bribery stalks in their midel, it was time to steal away. He was away when the Caminetti bil was passed and no matter what his views might have been, if it would be the Extender any good, he would vote for the measure, if the opportunity were again presented. He was willing to descend to the level of the Extender and to fight if it was necessary to establish his manfood.

The vote was then taken on More.

or filth if it was necessary to establish is manhood.

The vote was then taken on Merehouse's resentation and resulted in Managing Editor Lawrence being committed for contempt and ordered to jail until he snewered the questions of the committee. The vote was as follows:

Ayes-Androus, Aram, Beard, Boyes, Bulls, Chapman, Danieso, Filnt, Franck, Gilbette, Glarves, Jones, Linder, Luchinger, Mahoney, Morchouse, Pedir, Shine, Shippes, Eimpson, Smith, Trout, Voorheis, Withington, Welfo-25, Nose — Bert, Doty, Dayer, Teeney, Hall, Henderson, Langford, Larus, Prisk, Seawall, Stratton-11.

Toner was absent and Dickinson did not vols.

Oakland Races.

San Francisco, March 9.—The weather was fine at Oakland and the track

was fine at Oskiami won, Iron Jack 2, Monterey 3, Time, 1.15%.

Seven turlonza-Man Andrew won, Tulare 2, St. Distiff 3, Time, 1.3534.

Bix furlonza-Manustay won, Saltic Clicquot 2, Senator Grady 3, Time, 1.1934.

DEPARTMENT CHANGES.

Cabinet Officers Propose to Go

Slow in the Matter.

Washington, March 9.—All officers of
the new callingt have indicated a purpose to go very slowly in the matter of changes in the personnel. 'thoir depart pose to go very slowly in the matter of changes in the personnel. 'their departments. This is not very cheerful news to office seckers, and has been communicated directly to many of the aspirants who have been unable to repress their ambitions, and to add to their discomfort, it is intimated in some quarters that there are to be very few changes, save where the incumbent insists upon immediate referement, for some time to come. This may be an over estimate of the concervation displayed by the administration, but it is recalled that Mckinley, before his inauguration, held to the view that the changes in office, with the accompanying confusion and derangement of business, whould not he undertaken until the toriff bill is encated. This view is brought freshly to mind by the statement made today that a prominent assistant recerkary in one of the exemitive departments had been saked to remain in his place for five months.

It is expected that tomorrow John

of the exemitive departments had been select to remain in his piece for five months.

It is expected that tomorrow John Hay will be nominated ambassador to Great Britsin, and Porter of New York ambassador to Paris, and there may be a few other nominations, including General Powell Ollayton of Arkansus as minister to Mexico. One of the most important miscions. the President will have to fill will be that of minister to Spain, In view of the Coban insurrection this post demands great exercise of tact and still, and the indications are that McKinley will go every slowly in changing our minister thore. Few of the thousands of applications for office mention the position, and this certain that up to Sunday Mr. McKinley had no one in mind for it.

Mr. McKinley settled on J. H. Brigham of Ohio for assistant secretary of agriculture, and the nomination doubtless will be sent to the senate in a few days. Mr. Brigham is mactured the National Grangs. He is a war vesteran and has figured considerably in Ohio Prenident.

SENATE AGREEMENT.

SENATE AGREEMENT.

THERE WILL BE NO CONTEST OVER ORGANIZATION.

Republican Members Requested to Be in Their Seats Today.

Washington, March 9.—There will probably he few vacant seats on the Republican side of the chamber when the senata meets at noon temorrow. the Republican advisory committee is observed, for notices were sent by the committee today to all the Republican senators asking them to be in their seats promptly upon convening tomorrow. The purpose of the notice cannot be The purpose of the notice cannot be surmised by its recipients. They concluded, however, that it was connected in some way with the organization of the senate or with possible efforts made to seat those who had been appointed to the senate to fill the vacancies from Orsson. Kentucky and Florida. It is not the senate of the senate to fill the vacancies from of those appointed will be presented to understood that the credentials of some of those appointed will be presented to morrow. A rumor has been current attributing to the Democrata, silver Republicans and Populists an intention to try to control the senate at a very early date.

were sant out will probably render them unnecessary. The day was generally crowded by conferences of the leaders of the vortices and when night arrived it was pretty generally understood on all sides that the contest of organization which had been threatening for several days should not take piace, and the situation should be maintained as at present—the Republicans should control the committees and the Democrate the general offices. Although formal greenent to this may be postponed for a few days, the plane were agreed upon by the representatives of all parties today, and it looks now as if there would be no obstacles to the consummation of the agreement. This agreement is to be binding only during the present special session and the caming extra session of congress, it being maleratood that hatilities will break out again next Decembers when congress convenes in regular session.

THE MONETARY QUESTION.

President McKinley Has a Plan of His Own. Washington, March 9,—The Econing Star today eays: It is understood the President will not appoint members of an international conference commission

numerical vate. Stratton voted aya and Smith no.

Morehouse moved that the sergeantstarms be instructed to carry out the decree of the senate and it was so critered.

Sergeant-al-Arms Blaukburne took charge of Lawrence and Levings after adjournment and arrangements were entered into by the Kreminer peaple to get the mou out on write of habeas corpus the mou out on write of habeas corpus. Tonight the prisoners were turned over to Siteriff Johnson. Later they were collessed on write of habeas corpus lessed by Judge Hughes.

Konstor Morehouse in the senate to high tarnet to a high tarnet to a high tarnet to he will the evenling and wanted to know if anyhody had been appointed to represent the senate in the habeas corpus proceedings of which he had just heard. He said that he wanted stops taken to have the judgetm peached who had dared interfore with the sounts.

Senator Morehouse afterward said that Judge Hughes had exceeded his functions, and homorrow morning he would introduce a resolution in the senate to have him impeached.

Caktand Races.

Leadville Miners Give Up After Eight Months.

Leadvillex, Colo., March 9,—At a meeting of the miners union held to-night it was decided by a vote of approximately 900 to 200 to declare the strike off. This is the result of the recent vigorous efforts on the part of E. V. Robs and Mine Manager T. S. Wood, who is very popular with the miners.

The nivite was declared June 1, 1898, and has therefore lasted eight months. It has cost the camp inily \$4,000,000 heads the cost to the labor organizations of the country, which have contributed generously in sid of the strikers. The union claimed 2240 members when the strike began, and the vote tonight represents the decrease, chiefly by migration to other camps.

Correspondent Scovel Released. Clicquot 2, Senator Grady 3. Time, 1,1934.

Brewery Destroyed.
GLORE, Ariz., March 9.—Charles grainst Sylvester Scavel, the New York Wirld correspondent, who was arrested in the early part of February while in the early part of February while for?"
What do you destroyed by fire last night. Lose \$10,close to which controlled the form releasing him from custody. Mr. Scovel is now at liberty. HAVANA, Morch 9,-The Santa Clere

A QUEER NOMINATION

Agitator W. S. Cook Names A Candidate.

GRANT MELSON IS HIS NAME.

Aspires To the Trusteeship In the Fifth - Goneher's Fine Italian Hand.

On Monday evening a petition was filed with City Clerk Shanklin for the nomination of Grant Nelson, a colored man, as an independent candidate for member of the board of tity trustees from the Fifth ward. There are thirty-six names signed to the peti

are thrity-six names against the total sample in the star per cent required by law, but judging from certain irregularities that have been discovered it will be well to submit the document to the city attorney for thorough examination before putting Mr. Nelson's

ing to the matcontents and the resort to romancing to the behalf the support would seem to be something more than moral.

In last evening's issue of that reform sheet it stated that the Afro-American Lesgue had indorsed Nelson. This is pronounced by prominent members of the league to be an absolute failure faisendam. Neither the league nor the Colored Man's Republican club has indered Melson and there is no probability of either doing so, though a dermined affort will be made to bring about an indersement. What jobbery will be employed to accomplish this can resadily be imagined.

But to revert to the petition. The law requires that the signers to a certificate of nomination shall state their places of residence, giving the street and number. Soveral of the signers to Nelson's petition fail to do thus. Ed. Jones, for instance, doze not give the number of his residence. S. M. Waltom, another signer, appears to know neither the number of lis residence nor the street on which it is situated, for he gives now they in the petition, were delegates to the Democratic city convention. It is in order for Mr. Klee, the Democratic city convention. It is in order for Mr. Klee, the Democratic which is not interview those goutleman. T. J. Saulter, another signer, cried to register the other day and was turned away, not having heen in this city the required time. A. J. Dillinger gives his residence as 1802 J street, which is not in the ward. It. Milton Brown's name appears twice on the decument, a different way each time.

Rather an amusing circumstance

tor's eyes and who has taken each prominent part in nominating Mr. Nel son?

M. Theo Kearney appeared before the half of his petition asking for a fran-clise for the Southern Pacific to con-struct a switch to the Chateau Fresno park. It is Mr. Kearney's intention to

Ah Sam on Trial.
The case of Ah Sam, charged with The case of Ah Sam, charged with solling a lottery ticket, came up infore Justice St. John yesterday. The entire day was spent in examining talesmen for jurces, only seven were accepted. They are John Rader, J. S. Bedford, L. Popovich, D. H. Williams, I. L. Gruinger, S. W. Renfro and Jake Hefiner-Deputy flistrict Altorney Jones is prosecuting and W. D. Tupper und H. O. Tupper represent the defendant. When the Moomer gitle passed by yeolstay the atterneys became restive and Justice St. John indulgently adjourned caurt for two minutes to give them a chance to see the procession.

The North Side Whist Players The North Side Whist Players.
The North Side Whist Oluh was ontertained at Colonel T. J. Hay's residence last evening by Mr. and Mrs. J.
E. Brown and Colonel and Mrs. Hay.
There were about forty guests, and a
very pleasant ovening was spent. Mrs.
C. B. Shawer proved herself the best
player and won the first prize. The consolution award fall to Mrs. IJ. Z. AndiAfter the game vocal Soles were rendered by Miss Elsie Smith and Dr. R.
Cockrill, and the ovening's entertainment was concluded with a Virginia
reel, in which all participsted.

A Discrect Fatimate. A Discreet Fatimate.
"Papa," said young Mrs. Hunker,
"won't you please give George and rat
\$10,000?"
"What do you want that much money

for?" We want to build a \$5,000 house."

FLOOD IN ORIO.

The Situation Alarming In Cincle nati.

Cincinnati, March 9.—The midnight flood situation here has become alarming. About 9 o'clock tonight a thunder storm north and east of Cincinnati, only storm north and east of Uncinnati, only a selvage of which passed over the city, added three-quarture of an inch to the rainfall here in less than an hour. Oaptain Bassett of the United States eigent service said late tonight: "Last night's storm is now central over the lake region and the area of low preseure extends from Arkansas clear over the outer valley. All streams south of the Omaha are teeming full."
This puts an alarming phase on the situation in vigent of the widespread destruction of the late flood probably to be followed by a greater one.

DIAMOND NIPPERS

Get in their Work at the San Pedro

Harbor Celebration.

Los Angeles, March 9.—Expert diamond hippers who are probably curoute from the East to Carson to relieve he sports of their jowels during the bi ight, remained here long enough today fight, remained here long enough today to accumulate \$2000 worth of going iron the crowd that went to San Pedro to celebrate the decision of the harbor loard, During lunch at Terminal Island pavilion some one in the crowd started pavilion some one in the crowd started pavilion some one in the crowd started is lated, and after it was over General E. Bonton discovered that his diamond study, valued at \$750, was missing His announcement of the loss caused others feel for their gene and seven others discovered they had also been robbed. The police claim to have a clew to the robbers but no arrests have yet been made.

Nothing for Charity. San Fiancisco, March 9.—The will oble late Asa Fiske, who won notoriety as a money lender, was filed for probate today. The value of the cetate is not mentioned, but it is estimated to be worth \$1,000,000. A small sum is left to list three children by his lirel wife. The reat of the cetate is divided between his widow and her two children. Nothing is left for charity.

PRAYERS FOR CRETANS

THE CHURCH OF ENGLAND DEEPLY INTERESTED.

The Grecian Government Protests Against the Expulsion of Its Cousni From Crete.

he Turkish minister has asked to be re alled as he fears his life is in danger.

the Turkish minister has seen to be is called as he foars his life is in danger. Dr. Temple, archhishop of Canterbury, has seat a dispatch to the Mctropolitan of Athene, in which he says the established church of England is praying earnestly to the Almighty to give the Greakes liberty, justice and peace. The reserves continue to arrive from the provinces and the greatest intrest is displayed in the full text of the Greek reply to the powers, whole was not published in the full text of the Greek reply to the powers of the truest is the greatest intrest in the full text of the Greek reply to the powers, whole was not published in the full text of the Greek reply to the powers must all the evening. It is generally approved. The Epicromotic, the government or gan, asserts that orders have been sent to Commodore Sachtouris to instinct the position of the truek fleets in Greek in the Interior of the island. This, however, conflicts with a report that the distribution of the Greek consul the Willingth—This government has formally protested to the powers against the expension of the Greek consul from Oreto.

Oreto. The Turkish garrison has repulsed an attack an Pierpstria by 2000 Ohristians who accupied strategic points near the transcript town.
The Greek torpode fleet under Prince teerge has been ordered to join the content aquadron of the Greek fleet.

nust be apparent to every person who must be apparent to every person who has given the subject any attention. When the evidence before the Lexow committee revealed the fact that such combines take the industries of the nountry and throttle or stimulate them country and throttle or shumtare them at will by closing or running mills, it revealed nothing new, but merely laid bare a recognized soreto the public gaze. Through that investigation, however, some things were brought to light which the emphasis of figures upon the

eet the emphase of lightee apon-lact as it already was known.

Take the coal, sugar and coffee trusts, for instance. Here are some of the latest figures and estimates relating to them: The total average amount of coal a: The total average and this country recently has been ed in this country recently. Of this mined in this country recently has been 53,700,030 tone annually. Of: this amount the coal trust mines 43,000,000 tone, or about four-fifths of the onlire amount. The profit of the trust every year, estimated at \$1.55 a ton, is \$72,650,000. The sugar trust does not do so well, but it does well enough. The total yearly output of refined sugar is about 3,000,000,000 pounds, of which the trust produces four-fifths or about 2,400,000,000 pounds. Its or about 2,400,000,000 pounds. Its annual profit on this is about \$24,000 annual profit on this is about \$22,000;
000. The annual cofies output is 650,000,000 pounds, of which the trust
controls 455,000,000 pounds, or more
than three-fourths of the total. The than three-fourths of the total. The trust's profit on this output is, accord-ing to Mr. Arbuckle's estimate, \$4,950,-000 annually, while Mr. Havemeyer, who views it through sugar-trust spec-tacles, estimates it to he about \$14,850,-

o. So under their laws the people hav So under their laws the people have banded about four-hiths of the coal, sugar and coffee business of the country over to three combines composed of a handful of men, and the profits of this handful of men amount to from \$100,000 Mem. 000,000 to \$110,000,000 annually, an average tax of about \$1.50 on every citizen of the United States. And it will be borne in mind that these flavors relate to but three trusts of the many. Nothing, for instance, is eaid of the Standard Oil trust, which is more potent than any of those mentioned, nor of the to \$110,000,000 annually, an Standard On trust, which a more of the than any of those mentioned, nor of the railroad combine, for it is practically a combine, which places an inestimable burden on the American people.

It is no wonder under these circum stances President McKluley suggesti that the power of combines and trusts must be restricted. The problem is one must be restricted. The problem is one of the most pressing of the day; it has been so recognized by party platforms without number, and no President who intended to do his duty could overlook it. When it comes to the consideration of recognition for the consideration of remedies for the cyll, however, propositions are numerous. Ex-Senator are numerous, Ingalle says; "When the supreme court declared in the state bank cases court declared in the base of tax was that the power of congress to tax was the power to destroy, it delegated a formidable weapon to discontent, and formidable weapon to discontent, and placed in every bondeman's hands the means to cancel his captivity." This indicates clearly enough where the nower lies, but it may reasonably be feared that it does not pay sufficient attention to the fact that the will and the nower may be diverse. A congress power may be diverse. A coppress which would or could withstand the argument that the combined trusts of argument that the combined trusts of the country could bring to bear on it is not cleeted every two years. The power to tax trusts out of existence and the will to do so are two quite different things, as na attempt to put ex-Senator Ingalis' theory into practice might demonstrate.

A more honeful suspension, because it

Ingalls' theory into practice might demonstrato.

A more hopeful suggestion, because it proposes to take hold of the question more tentstively, and radical measures med not be expected, is made by some of the United States senators. It is to the effect that the trusts first should be investigated by the various states, and thatan investigation by a national non-partisan commission should follow. This is subject to the objection that the states might fail to investigate, but rush a failure need not result in the dismissal of the national commission should be vested with full powers to summon, to examine sade to punish recalidation when the summon sense, its report to congress would be might be very supposed to the national commission should be vested with full powers to summon, to examine sade to punish recalidation when the proposed in a truncing state growth. Jaw is law. A South Dakota court in the firee and easy South Dakota court in a New York court decided that the binned that the woman should go the proposed that the summon is supposed to the mational commission should be vested with full powers to summon, to examine and to punish recalidation, a New York court decided that the loss that the woman should go the proposed that the proposed that the fire and a divore to a New York court do divore to a New York court do not be proposed that the proposed that the proposed that the fire and a divore to a New York court do not be proposed that the fire and a divore to a New York court do not be proposed that the proposed A more hopeful suggestion, because it proposes to take hold of the question more tentatively, and radical messures need not be expected, Is made by some of the United States senators. It is to the effect that the trusts first should be investigated by the various states, and that an investigation by a national nonveated with full powers to summon, to assume and to punish recalcitrant witexamine and to punier recacurant wit-nesses. He report to congress would include not only a statement of deter-mined facts, but also a recommendation of the course to be followed in dealing

include not only a statement of determined facts, but also a recommendation of the course to be followed in dealing with the trusts. It would place an effective weapon in the hands of the opponants of combines.

Whatever may be the outcome of the present consideration of the question, it is something that the national legislature at least are admitting that something should be done about it, and it is much to have had restrictive action recommended by the President. It is a matter which, wheap properly ventilated, is bound to come to a solution in the interest of the people whom it oppresses. It has but to be sufficiently understood, and its end will be at hand.

The Los Angeles Times warms laboring men not to come to that country, lured by the prospect of obtaining work at San Pedro. At the present time large num.

Pedro. At the present time large num-bers of workless men are being supported in Los Angeles at the public expense and the operations in the harbor will

lar continuent was heard:

Resolved, That this mocting of citizens of London expresses its etrong sympathy with the Cretinas in their heroic struggle against the intolerable tyranny of the Arriva occupratulates Greeco upon having, by her gollant conduct, effected the deliverance which the united powers have been unable to schieve.

The resolution further protests against

The resolution further protests against the attempts made by the powers to coarce Greece and calls upon Lord Salisbury to retuse to put the guns of the British fleet to nuse which will be a disgrace and humilistion to Great British. It is gratifying to read these expressions from the loyal bearts of our bottlers across the sea. They tell us in Jein target that however shiect the The resolution further pro plain terms that however abject the plain terms that have the trulers may be in their service to the bondholders and the money changers, that their action is repudiated by the masses of the English people, who pre-fer possible war to certain inlamy and

HENRY HEITFELT, the new United States senator from Idaho, was a farm band in Kansas only forteen years ago And still there are people who say that all evenues for the advancement of poor men are closed in this country.

The people of Freeno have had a capa-ble and economical administration o municipal government for the past two years, and they will express their approval of the gratifying fact at the approaching election.

FRED DARY JR., one of the publishers of the Mariposa Gazette, died recently of on. He was scarcely 21 year old, and is said to have been an ex emplary young man.

RANDOM REMARKS.

Sam Davis of the Carean Appeal recently banquated the newspaper men who are in attendance upon Oorbelt and fittainmone. It was a pleasant thing to do, of course, but the suspicion will suggest their fitat the Oarson caterers are more accommodating and trustlat than those of some other places. If not, now did he do it, you know?

"How's the pit where we keep the people who look upon truth to scorn it?" inquired his Satanic Majesty of the chief of the gang of etolers, "Pretty dinged hot."

"Fretty diagral lact."
"How's the southeast corner of it, where we keep the worst of thom?"
"Seven times heast."
"All right; see that you keep it so.
I'm expecting those jurges who you to to acquit in the Chimese lottery cases any day now."

day now."

The Sacramento Bee refers to the isles of Greece, "where burning Sappho loved and enok." The Bee mendly is on accurate in its information that I do not sell estimate the interest of the noreflection on it as a newspaper is call attention to the fact that latest researches justify the brief that Sappho did not sink; sine mercly sung. I min mietaken in holding to this opinion in shall be glad to be corrected, but until I am, I shall be glad to be corrected, but until I am, I shall was specially was singing rather than sinking.

Ex-Senator Ingalls says that "the campaign of 1000 is now on." This probably settles it, so far as the campaign of 1900 is concerned, but how about the campaign of 1901? Is that now on? And, by the way, what is the campaign of 1900 on? And what do you suppose would be Mr. Ingalls views if be were as senator? The campaign of 1900 arrives. The foreing it backward a few years is liable to result in stunding its growth.

Bome had things may have been done
Some had things may have been done
in Sacramento, but it must be clear to
anyone that it was the representatives
of the other fellow's party who did them.

and the operations in the harbor will give employment to no more than already are in that wicinity.

KILLED ON THE WIRES

Lineman Smith Electrocuted Yesterday.

HIS BODY HORRIBLY BURNED He Was Working On "Dead" Wire ow Was the Current Caused?

Albert A. Smith, a lineman in the employ of the San Joaquin Electric Company, was killed yesterday afternoon while working on the wires about a quarter of a mile north of the Barton vineyard. The wires from which he received the fatel current were supposed to be "dead," and had been so during the day. How they begame charged and death-dealing has not yet been accertained, but the supposition is that some misureant threw a wire across the Albert A. Smith, a lineman

some misureant throw a wire across the stringed lines, conducting the current from the live wires to the dead.

The electric company has been caused much annoyance and suffered considerable to the dead of the construction of the lines which has been carried on by unknown parties along the line from the hills to this city. Now that it, has resulted in the laking of a human life the mischief workers will elther cease their "sport," or take the consequences.

Smith was working freely among the wires, feeling certain of no danger because the current me turned off. He was repairing the fastenings of three wires along his line. These were on one cide of the pole, two on the top cross-arm and one on the lower. On the other side of the pole were three high tension wires, farrying a voltage of 10,000. Of course the lineman did not touch times.

Smith and one on the lower. On the string of the dead wires all day, About 30 clock Smith was perched on the arms of the pole, straidling the top one and his feet resting on the lower.

Francis, in his statement, any he was just beginning to ginb the next note which and he can be aw the trousers of the unfortunate lineman brainer, Smith's body fell forward, and was flush the next pole when he saw the trousers of the unfortunate lineman brainer, Smith's body fell forward, and was flushed to the immediatory disconded to the ground and began repairing for hein, but seeing that nothing could be done as long as the wires were charged he jumped into a lungay and drove with all possible haste to the residence at the Ratun vineyard, a mile and a quarter distance, from where the telephoned to the embatation in this city at turn of all the currents. This was done in a few seconds, but too late to each the life of the Hisman.

After Francis started for the Barton residence, a negro named William Avery

as cannot up and all the fluctuations are described by expression.

Major Dennett wishes it understood that he has no personal feeling against he fusion nominee for city clerk, but he is on the war-nath against the cheme of the politicians who call themselves Democrats but crowd good Demorated for the control of the International Control of the Internationa

wire under his stomach then gave him the slock; I think, which killed him. It smoked and hurned with a sizzling consistency. When Francis returned from the Barton residence, Smith was dead, and his body was held by the wires. The current was turned of, and the fiest had cesach turned; of, and the fiest had cesach turning. Francis climber to the top of the pole, and by means of a rope let the body dawn. Before it reached a lite graund, however, the bult around the graund, however, the bult around the body broke and let it drop several let to the graund; however, the bult around The remains of the dead hisemon were brought to this city, and lest evening Coroner, long held an inquest as Stephens & Bean's undertaking parlors. The verdlet of the jury was accidental death, "from coming in context with a live blectrie wire."

The body presented a clocking appearance. The left trongers leg and the clothing over the addomen had hene were barned and sharred in a borrible manner. The thursh on the right hand was almost barned off, not this is where the lineman is supposed to have first received the current.

At the same time Smith was killed a lineman working on the same wires in the foolfulle was knocked off the pole by receiving a check from the wires which were supposed to be dead. He received ento burne on the hands, but was not otherwise injured. How sam unotherly selections and, falling forward, prabbed a live wire along the stone carrying the current. It is also possible that Smith, lost his balance and, falling forward, prabbed a live wire and lalling forward, prabbed a live wire and lalling forward, prabbed a live wire and lalling forward, prabbed a live wire and line proper stome and falling forward, prabbed a live wire and line proper stome and falling forward, prabbed a live wire and line wire with his hald, and tone his prab true were with his hald, and tends to missing the current which killed him and knocked the mountain lineman from his perch. The severe burning of the context of the security which killed

Instructive Paper by Miss M. D. Eshleman.

TO CONDUCT A DAIRY

deanliness an Important Requisite Valuable Information on Selection of Cows.

The following paper by Mirs M. D. Eshlemen on "Dairying in Fresno County" was read at the Farmers' Insti-Occury was told in this city and is de-tute recently hold in this city and is de-serving of careful perusal by those who intend following that industry as well as

The chorus was very good and two or three of the selections sung were pleasuring of the selections sung were pleasured to the period of the selections are good and two or three of the selections are good as a selection of the contract to voice was heard everal times during the evening and contract to the performance, diede forth plenty of applaues and was responded to with an enemo. The transported to the performance of the best feature presented during the evening of the others and was the best feature presented during the evening of the others and was the best feature presented during the evening. He provoked a great deal of laught to best feature presented during the evening. He provoked a great deal of laught to best feature presented during the evening. He provoked a great deal of laught to be the selection of the other than the provoked a great deal of laught to be think, be greatly improved if given a calcular light effect. The honzon march was prestly done by sixteen girls in fleshings. We think they should have had more stage room, however. The evening entertainment closed with a buriesque called "Pire-A-t-Up-to-Data" which was long drawn out and gut tiresome towards the last. Only the of the parts were at all well taken that of Sir Joseph by George A. Bird, and Rahph Racketraw, in which character Miss Hoff appeared. It is plain that W. N. Miller is new to the stage. His bartione voice at times was pleasing, but he spilled any yood effect that he might produce by leaving the ctage before finishing has solo.

Vigorous Efforts to Be Made to Have the Buty Inстеваед.

party theoreaxa from the cruly practical comprise the curses basis of success, rather than the mere accident of where a man was born.

When sleven years says Fresso was found to be that Mecca where asthma caseed to trouble and health abounded, our family, weary of seeking health resorts, gladly dropped into the quiet of homelife. One drawback was discovered when the butter was found not to be palatable, for we were critical, our ideal being formed on the tatle we se well knew of the Philadelphia "gille dege."

A few nows were purchased, among them a self miker, a ricker and cowe that seemed intended for other purposes, as they preferred to milk a few months and then go dry. We found curselves with a few pane of milk and the book "A B O of Futter-making," ready to try to make good butter. Those pans of milk were indeed a trial; they were carried from room to room, as the temperature varied.

We soon found that the making of butter by the Paris method would give un less trouble in securing the prover rising of the creen. The milk was heated as soon as possible after being drawn from the cowe, to a canding point. Here it was necessary to use great care, for it the least boiling occurred the grain of the lutter was apossible and after twelve hours was knimed. We aften failed in lack of high flavor and exhaustive churning until we learned to properly ripen the cream. Each skimming was carefully mixed with the rust of the cream, and the temperature kent as even se possible. When the cream the disputy self, but not alrong or rancid, and when the lutter was repeated to deep the drops of cream failing gently from the spoon on the satin surface look about twenty seconds to dispute action and to disappear, the cream was ripo and roady to he charmed.

Later we bearmed to ripen the cream. The attendance at the opening of the third accession of the San Jacquin Valley Medical Society pasterday was not very large. This was owing to the fact that the doctors from the southern counties did not come because of a delay to the train on which they had expected to ardid not come because of a delay to the train on which they had expected to arrive in the morning. The train did not arrive until in the afternoon. A number of the morning. The train did not arrive until in the afternoon. A number of the contern members of the context of the context of the context of the context of the delay to learn the context of the train, which they did not do, however. In the absence of the president, Dr. L. E. Felton al Hanford, Dr. W. N. Biorning of Marcel, was elected to preside temperarily Dr. E. Q. Dunn, the tectrain, which they did not do, however, and the absence of the president, Dr. L. E. Felton al Hanford, Dr. W. Shorting of Marcel, was elected to preside temperarily Dr. Q. J. Mimer, his assistant, were in attendance.

The following were the physicians present: Dr. W. T. Manpin, Dr. T. R. Mowel, Dr. J. L. Maupin, Dr. P. N. R. Well, Dr. J. L. Maupin, Dr. P. N. R. Rowell, Dr. J. L. Maupin, Dr. P. N. R. Rowell, Dr. J. L. Maupin, Dr. P. N. L. Blacker, Dr. J. Beleiman, all of Fresno; Dr. A. R. Nitholson of Uceander, Dr. J. J. Knowlton of Fresno Flats. The last two were elected members of the solicity yeakerday.

On account the southern conation all the important insures was laid over until boday. The banquet, which was to leave the county to day.

falling gently from the space on the satin surface took about twenty economic to disappear, the cream was ripo and ready to be charmed.

Later we learned to ripen the cream by using starters, bome under and commercial, to give us the benigh houlif of good flavor and aroma, and by careful cleanliness to avoid the evil benigh, that, nurtured in fifth, produce had shaver and decomposition of the cream.

As the milk would occasionally be tainted, we bad a cement floor Indi in the old cow harm and mude free use of gypsum to control colors. The cows were well groomed and the manner handed away daily. Perfect milk was the result, showing we had reached the correct of contamination.

The most improvement was a Baby No. 2 be Laval separator, and it was a little marvel that thread dulrying inform attractive pursuit. The Babcock test cost followed and we rapidly learned in the buttermills, until by the end of 1803 the butter making was well under control.

We had about thirty cown and a few

various phases. The discussion which followed was taken up with interest by the doctors.

Dr. J. L. Maupin followed with a paper on the "Enteling, Pathology and Symptomatology of Prominonia." The denter dealt with his topic in a thorough manner, and aroused a lively discussion. Nearly all the physicians expressed their views as to the treatment of the disease, which is one of the nest interesting to the fraternity.

Dr. Dunn recounted some of his experiences while practicing in Tombulone, Arizons, of how atrong, healthy louding miners, who had been exposed to dampness and mountain this, would come to town and he taken down and denly with preconation. They would sometimes be taken ill while sitting in some eshoon, apparently enjoying the best of health. Quite often, too, they would be found dead. The society adjourned (ii) this morning at U.30 olock, when a large attendance is expected. the hutter making was well mader contito.

We had about thirty cows and a few contoners, to whom we furnished butter with pride in our success in a new pursuit. We now concluded to increase our hord, making it a matter of business, imping a cover the losses of the ruisin vineyard. The process were approached, as we desired them to handle the futies, into everywhere we ware repulsed with remarks as follows: "No one sever made butter in this valley our enatomers could not in the const." "It may do for ramch folks." "Cows is different critters here from an the const." "A hald is me good to make butter." "It may do for ramch folks." We felt sure it could "be did." After a caroin study on the subject of utonsils most needed, we connect to purpling it with a 4-horse power capine sind boiler, a large churt, a butter worker and utils and cream vale with het and cold water fittings and sinks for the washing of the smaller articles. Only the opinioners actually rended were purplicated, as we had no money to waste on the creamery promoters that ure an plantific everywhere.

Eighteen months latter another room was added, and a Sharpless Russian elements of 1500 penud sper hour, replaced the Barly No. 2, now too small for our use. The demand for the butter was now greater than by waiting for our own helfers to because cases. We hought or hired, to be prolitable dairy animals.

It is not only the price roceived for oach pound of butter, but the disaponting of the medicules of the lord tree o We had about thirty cows and a few

THE ZANTE CURRANT. IT MUST BE CLASSIFIED WITH

Dr. Rowell, one of the committee ap-pointed to go to Washington for the nur-puse of inducing congress to reject the classification of Zanto currants and to

bought or hired, to be produced animals.

It is not only the price received for each pound of butter, but the uleapon-ling of the production of milk by both feeding properly and by saing improved breedle, that needs to be studied to make be durying a success. The food must be palatable to the cave to that she will eat heartily, for the heat milk producers are the heart general. Alfalla hay one of the best foods, is reliced of half its value for milk making by being cut too late, when it is placed in the managers of secure a higher tariff on that product, will leave Freens Thursday alght. He will be joined at San Francisco by Colonel William Forsyth, the other member of the committee, and by General Chipman, whose services have also been as cured. Ex. Congressman Rowell of Ill. 100. by bother of Dr. Rowell, has also promised his assistance, and his acquaintance with members of the ways and means committee and many members of toogress will innountedly he of great aid to the Galiforninas.

The ways and means committee has recommended a duty of 1 cent on Zante currents and of 2½ cent ou raisins and other dried finils. The duty on the so-called current is entirely inadequate, and the delegation sent from Fresno will do its atmost to have the product school-nled with raisine, under which classification it belongs, and the duty made uniform. An attempt will be to have a uniform duty of 3 cents imposed.

The committee requests growers or packers who have samples of Zante currents and sendies values and sendies taken to deliver the same at Dr. Rowell's office, a but is desired to take a quantity to Washington for the purpose of illustration.

The supervisors perstorialy granted the purpose of illustration.

The supervisors perstorialy granted the purpose of illustration.

The supervisors perstorialy granted the purpose of illustration of this case if the day before for an appropriation to help defray the expenses of the committee at Washington. The amount appropriated was \$1223, about all that was left in the advertising limed. It is best lived duty the resident of the meaning needed will be raised among the business men today.

Committee to Whictier.

Maria del Froir, the 13-year-old girl who was arrested in a bouse of ill-famu, value for milk making by changers o the cows a mass of dry consistency only to be rejected and drouped under the cows a mass of dry consistency only to be rejected and drouped under their freet, instead of the only sweet hat to be salen with a relieft, that a little lorethought could have so wall provided Alfalia posture alone is not a perfect food. RHEUMATISM

DAIRYING IN FRESNO.

pontar, making 475.0% gross receipts; het product, \$22.3%. This enimal cost \$150 as a yearling, so we naturally regard the Holetoin breed to be a good investment.

In placing a herd on a 300 pounds a year basis, one must be ruthless in send-lug to the Intelier cows that produce 250 to 275 pounds of butter yearly, for it is these cows that are nearly good enough that are the little force in the vineyard to eat up the profits.

The secret of success in dairying is care in keeping accounts of the little itoms and doing the work exactly on time, with unfailing eleminises. No amount of dectoring will remove the detrimental effects of fifth if the milk is once contaminated. The place for a fortilizer is on the fields, not in the milk paile. The same care shown in the making of the butter shown in the making of the butter should extend to the marketing. Pieces of muslin with ravoled edges, suggestive of grandmarg bag, are not as clean looking a wrapping for the butter as the parchiment paper now furnished so cheapily as to be within the reach of even the smallest dairy. A dirty delivery wagan drown by a pair of kinny, ungroomed horses or mules, with unblackened harmess, tied together with bits of ropes, is not a good advertisement of the neathers and cleanliness of the manager of the thing the same crewded to the wait. There is room for the cows and for the dairy that sends out the wagon. The dairy that sends out the wagon. The dairy that sends out the wagon and the dairy that cond and the dairyman of the thing cleas whose alm is to produce purfect milk. Our dairy inspector and our county health officer for the past year have done secolent work. They were a credit and conscientions men, contending with the caroless, and ontering futting the difficulties of the careful, in furnishing healthful dairy products of the past year have done secolent own. The ward force and the dairyman of the milk new milk men until the year have never been credited for the quality of the cleanest and here article. The milk can and past of t ital is painfully evinced by come of the calves being born with weak loins and backs, almost amounting to rickets, when the dams have been pastured for long periods exclusively on alfalfa. We are growing oats and peas to fill the new silo and hope to cheapen the required protein and gain succalency at the same time. The same pixe of land in the summer will raise a second crop when planted to white dent corn to fill the old silo. These two crops make more toad than the same land could possibly produce if planted in alfalfa. We found in Hoard's Internation, the daily and weakly records of herds that are surpassed our own. We determined to weed out our poorer cows. In December, 1803, a cow ledger, giving each cow her separate account, was opened. The Babeock test was regularly unde of the individual tests were compared with and corrected by, when necessary, the composite tests made either immediately before or after each monthly test, thus inserting absolute accurate account were footed up and culling commenced. We have culled from eixty-live cows raised out the ranch teenty-three as more "fillier of the field." It was hard to do so, ar many were daughters and granddaughters of special pess. It naise.

of nitk, making 57.51, pounds of butter in 1876.

The Holstein caw on allstia is in her natural; environment. When we remember the meadows of Holland, cowered with grasses kneedeep, where the cowered with grasses kneedeep with grasses kneedeep with grasses and the making of least the continuent to be an great a producer as on her hone meadow of grass and her hone meadow of grasses and her hone meadow of grasses where the continuents be an great a producer as on her hone meadow of grasses where the continuents be an great a producer as on her hone meadow of grasses where the continuents be an great a producer as on her hone meadow of grasses where the continuents of the particular of the continuents of the particular of comparitions which require working in dust are detrimented to honevity and the making of the butter cost u \$\$1.06 a cow during the producer as of the cow and the making of the butter cost u \$\$1.06 a cow during the producer as the continuent of the producer as the producer as on the continuent of the producer as on the continu

rrents producer as on her home mend-ows.

Our grade Holetoin herd reached in 1996 an average butter production of 339-25 pounds a cow. Of these thirty news news mone are over eix vears old and nine are heliers. The feeding mile-ling, care of the sows and the making of the butter cost us \$51.06 a cow during the past year, so all the butter each cow produced over 204 pounds was profit; and in addition the calves and the skin milk for the pies should be added, though we cannot separate the propor-tions correctly due to these last two

We believe the grade herd us a little over \$30 each. Our w, a registured Holatein, made counds that sold for 25 cents a naking \$443.37 kg gross receipts; duct, \$32.37 kg. This satinat cost a yearling, so we naturally re-

Emerson Pleaded USEGUL PRESENTS Guilty Yesterday.

CONFESSED TO HER MOTHER

The Girl Was Corrupted by a Aged Reintive-A Strange Story.

ing and writing an obscone letter, a peared before Justice Austin yesterd norning with her attorney, E. D. Ed

The confession of Mary Emerson en

the mystory.

Mrs. Enseron had implicit faith the daughter's innocance till Monday. On the morning of that day the postman brought an anstamped letter to the Emerson house addressed to Mary. It purported to be signed by Tom Rieley. The writer stried that the girl alone could save him from the consequences of having written the lutter and appealed to her to do her utmost in that direction. He said that whenever his flather came home he turned to him (the writer) and said that whenever his flather came home he turned to him (the writer) and said in a threatening meaner "pentienting for Hin." The visit of a young lady to his mother was gies mentioned and the letter wound up with the statement that his father had threatened to kidnap her—Mary Emerson—and take her to Chinatown, and the wield that he would take her to Europe instead.

the girl in a movery manner to repeat to her better nature, and report the usual to him.

Mrs. Emerson abeyed the less yer. She went home and, folding the child in She went home and, folding the child in She wante begged her to say truly whether or not she had written the last better purporting to be signed by Misley. She pleasted with her without receiving an answer. Finally Mrs. Emerson asked Mary is he would say she had not written it. The girl replied more than the leading of her adopted motion at last had their effect, and Mary confessed having written that and the other creates the state of the same with Risley's name. She free that he was the same with the saked why she had individed once the court was signed with skiley's name. She free when saked why she had individe ducks to the rest and the cold of the saked why she had individe ducks. A COUNTERFEITER CAUGHT.

The Police of Syracuse Make an Important Capture.

On Monday the 15th, Harold Marquisce, of Utlea, N. Y. was arrested in Syracuse, N. Y. was arrested in Syracuse, N. Y. was arrested in Syracuse, N. Y., ma a warrant aworn out by the Dr. Williams' Medicine Co., that in with forgery. On the bid of December Marquisce visited a photoengraver in Syracuse, asying he was the representative of the Dr. Williams' Medicine Co., and arranged for the insking of a full set of plates for the direction never the system of the Pale People. News of this reached the house office, and not time was lost in arranging for his arrest whom he should return office, and not time was lost in arranging for plates. He returned on the 15th and wise accordingly arrested and is now in jail in Syracuse awaiting examination, which occurs on March 23.

This arrest proves to be an important one. In addition to various pionier, such as medical books, typowriters, russ, etc., found in Marquisee's truck when arrested, the police also found counterfeit coin both in the trunk and on his person; and in seearch of his apartments at Utica found a complete outlit for counterfeiting consisting of crucibles, bellows, nickel, lead, hismouth, aptimony, a small blackennith force, a charcal furnoce, and several planter-olparis molds. The United States marshals want him just as coon as the Dr. Williams' Medicine Co. are through with him, and, no doubth, he will be sentenced for a long period.

In selecting Dr. Williams' Pink Pills for his counterfeiting operations, he showed his knowledge of the proprietory madicine business; for these pille are in such great domand that they are easily sold at any drug etero in the United States. His scheme was to work the country druggists and sell his imitations at a discount of from 2 per cont. to The Police of Syracuse Make an

A COUNTERFEITER CAUGHT.

than condemned. Her's is no ordinary case of wrong doing; her whole moral nature accents to have been in some way perverted.

An inclient mentioned by heraelf probably accounts for her peculiar perversion. About four years ago she went out riding with an inderly male relative, who was visiting with her mother. They came home late, and as soon as Mary came home late, and as late with a chill. She appeared extremely nervous and all in all acted very strangely. Upon Mrs. Emerson insisting on knowing what alted her, the child sand that her companion had need hurrible language towards her. Mrs. Emerson child the saying, It appears, though, that he often found occasion after that to make asying. It appears, though, that he often found occasion after that to make disgusting physical details—in the most disgusting physical details—in the most disgusting physical details—in the lord reproduct the most of the most had been accounted they have been dead to burn into her very soul. Mrs. Emerson never learned this until last Monday, and of cumas she was greatly surprised. The relative referred to has been absent from Fresson avers large that she personal refer had been coupled him to leave her house on account of his intemperate habits.

Mrs. Emerson never leading the trouble and sorrow her daughter's conduct had caused other people. She would favillingly atone for it all it she would amy to the Genian the girl. With Justice Austin's permission she will seen dany to the Genian the girl. With Justice Austin's permission she will seen days to the feelam the girl. With Justice Austin's permission she will seen on make an interest has been to make an interest has been to make an indecent exposure of the credit inpan thesil, when the fact is that all it has done in the matter has been to make an indecent exposure of
